**WARNING**

This document contains information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive information in the designated control channels. Its security must be maintained in accordance with regulations pertaining to TALENT-KEYHOLE Control System.

## INTRODUCTION

This report concludes a series of reports by NPIC on North Korean ports and naval installations. As significant changes occur, better quality coverage is obtained, or new installations are identified, updated studies will be prepared.

The Yongamni-chung-chon port facilities are located on a small man-made breakwater-protected tidal basin. The port facilities apparently serve the industrial complex at Tanchon.

REFERENCES

3 nm SE of Tanchon.

Yongamni-chung-chon is a minor port serving the Korean fishing fleet. Its small shipyard is capable of providing maintenance for small combatants although none have as yet been observed on the ways. A small probable naval facility is also located within the Yongamni-chung-chon port complex.

Facilities include 4 quays and several probable fish processing plants. The probable naval facility is comprised of 7 buildings arranged around a small drill field and a portion of the port facility quay. The shipyard has 6 building/repairways, 2 transversers, 1 small probable fabrication building, and 8 support buildings.

Depths in the basin formed by the breakwaters range from 3 to 13 ft.
